HIGH-PERFORMANCE WIRE AND CABLE FOR INTERCONNECT APPLICATIONS

*The right solution for every mission-critical
interconnect harness/assembly*

Glenair is unique in the interconnect industry in that we design and manufacture every key component part used in today's most high-performance interconnect harnesses and assemblies. From discrete contacts to connectors, backshells, EMI/RFI shielding, jacketing—and now wire and cable—Glenair manufactures and supplies the full range of requirements.

Introducing Glenair high performance wire and cable: Our line of high-performance wire and cable includes Mil-Spec and commercial variants of commonly specified M22759 type multi-conductor shielded cabling, as well as a full range of Quadrax, Coaxial, fiber optic, and protocol-specific (Ethernet, USB, Firewire and eSATA) cables. We also offer several unique and high-performance cable solutions of our own design for harsh-environment power and signal applications. Best of all, Glenair high-performance wire and cable is offered in short runs with no length or dollar minimums. Fast turnaround—up to and including stock—is our model. Call the factory or visit our website for price and delivery information.

Introduction and General Reference

Overview of Glenair cable and jacketing materials for every high-performance application requirement

A

M22759 Single-Ended Data Transmission Wire

Glenair's range of AS22759 wire and cable is qualified to SAE requirements

B

Quadrax Cable

High-speed transmission solutions for 10/100/1000BASE-T Ethernet applications

C

Coaxial Cable

50 and 75 ohm Coaxial cable for use in radio frequency and microwave applications

D

TurboFlex™ Power Transmission Wire

TurboFlex™ power distribution cables are fabricated from highly flexible conductors and high-performance insulation to produce cables ideally suited for applications where flexibility, durability, and weight reduction are required

E

Optical Fiber

Singlemode and multimode graded index fiber optic cable for mission-critical applications

F

Protocol-Specific/High Speed Cable

For USB, Ethernet, SATA and other general-purpose/protocol-specific applications

G

In addition to terminated and tested cable assemblies and cordsets, Glenair is pleased to offer our customers discrete bulk cable for on-site termination. All of the cables in this catalog have been designed and manufactured for optimal performance in mission-critical applications such as soldier systems, medical equipment, aerospace, geophysical and other military and commercial environments that rely on guaranteed signal integrity and cable durability. The catalog is organized according to application type, beginning with general-purpose non-impedance-controlled signal wire, and continuing with a full range of high-performance shielded multi-conductor cables, including Coaxial, Quadradx, flexible power, fiber optic, and so on. Glenair cables are designed to optimize flexibility, weight reduction, ruggedness, and insulator quality. Our protocol-specific cables are offered with guidance as to shielding properties, impedance performance, attenuation, temperature rating, bend radius, weight, and maximum practical distance.

Custom Capabilities

TurboFlex	Highly flexible interconnect conductors and cables for power distribution applications
Duraelectric	High-performance, flexible jacket material with outstanding resistance to environmental stress factors including heat, UV radiation and caustic chemicals
Multiconductor cables	Custom, short-run cables for unique applications such as robotics, defense electronics, and soldier systems
Overbraiding	Extensive range of conductive and non-conductive wire and fabric braid materials, including ultra-lightweight composites and micro-filaments

Glenair's vertically integrated connector, hardware and cable facilities are perfectly positioned to supply catalog and custom short cable runs for the broad range of interconnect applications from non-impedance controlled transmission wire to high-speed, protocol-specific cabling—all with no dollar or length minimums.

Series 96 High Performance Cable for Interconnect Applications

Rugged environmental jacketing in a broad range of material types and colors

- Extruded, blown-on and heat shrink jacketing for harsh application environments
- General purpose polyurethane
- Low-smoke, zero halogen Duraelectric™
- Chemically-resistant Viton®
- Industry standard neoprene
- Selected materials CBRN tested

High-performance cable and jacketing materials for every application requirement: Immersion, chemical or caustic fluid exposure, temperature extremes, and UV radiation.

Glenair operates one of the largest multi-spindle overbraiding operations in the world

Coiled cable configurations for radio and comms applications are a Glenair specialty

Wire Type	Application	Commonly Used With
M22759 Single-Ended Data Transmission Wire	Non-impedance controlled signal applications	Non-shielded 39029 contacts
Quadrax Cable	10/100/1000BASE-T Ethernet applications	854-001/854-002 Quadrax contacts
Coaxial Cable	50 Ohm/75 Ohm RF transmission	Size #16, #12, #8 Coaxial pin and socket contacts
TurboFlex	High-performance (temperature, weight, flexibility) power transmission	Series 970 PowerTrip™, MIL-DTL-38999, Series 80 Mighty Mouse,
Optical Fiber	Ruggedized mil-aero singlemode and multimode optical data transmission	EyeBeam (expanded beam) Glenair High Density (GHD) Series 80 Mighty Mouse fiber optic (Size #23, #20HD and #16) MIL-DTL-38999 Size #16 and #20 MIL-T-29504 QPL
Protocol Specific Cables	Commercial digital data device connections including Ethernet, USB, SATA/eSATA, Spacewire, LVDS/CML	High Speed Mighty Mouse Mighty Mouse with Ultra-Twinax Differential Twinax contacts SuperSeal USB/RJ45

All Glenair cable part numbers are in stock and ready for immediate, same-day shipment with no length or dollar minimums.

*Airframe non-impedance-matched
data transmission cable*

Glenair's range of AS22759 wire and cable is manufactured and qualified to SAE requirements for this, the most commonly applied of all aerospace data transmission media. We offer a complete selection of styles, sizes and colors in twist, overbraid, and jacketed configurations. Wire may be supplied etched, stripped and cut to specific lengths to meet any application requirement. Airframe non-impedance matched data transmission cable is often only available in long cable runs and/or minimum dollar or length quantities. Glenair offers same-day shipment on popular wire—and every 39029 contact you might need—all with no minimums.

M22759 Single-Ended Data Transmission Wire Selection Guide

Mil-Spec

B

M22759/11 Silver Coated Copper Wire with Extruded PTFE Insulation

For high temperature applications such as aircraft engines and where increased abrasion resistance is required

B-6

M22759/16 Tin Coated Copper Wire with Extruded ETFE Insulation

For high temperature applications such as aircraft engines and where increased abrasion resistance and solderability is required

B-8

M22759/18 Tin Coated Copper Wire with Thin-Wall Extruded ETFE Insulation

For aerospace applications where light weight, abrasion resistance, mechanical durability and solderability are required

B-10

M22759/32 Tin Coated Copper Wire with Crosslinked, Modified ETFE Insulation

For high temperature, light weight aerospace applications where mechanical strength, abrasion resistance and solderability are required

B-12

M22759/33 Silver Coated Copper Wire with Crosslinked, Modified ETFE Insulation

For high temperature, light weight aerospace applications where increased mechanical strength and abrasion resistance is required

B-14

M22759/34 Tin Coated Copper Wire with Overall Braid and Extruded ETFE Insulation

For high temperature airframe and avionics applications where abrasion resistance, mechanical durability, and EMI/RFI shielding are required

B-16

M22759/44 Silver Coated Copper Wire with Crosslinked, Extruded ETFE Insulation

For protected harness applications where high temperature resistance, mechanical durability and flexibility are required

B-18

M22759/45 Nickel Coated Copper Wire with Crosslinked, Extruded ETFE Insulation

For protected harness applications where high temperature resistance, mechanical durability, corrosion resistance and flexibility are required

B-20

M22759/46 Nickel Coated High Strength Copper Wire with Crosslinked, Extruded ETFE Insulation

For high temperature applications where mechanical durability and, corrosion resistance are primary requirements

B-22

M22759/90 Nickel Coated High Strength Copper Wire with Double Layer Tape Wrap Insulation

For high temperature applications where mechanical durability, corrosion resistance and cable strength are primary requirements

B-24

with Extruded TFE Insulation

Table II: Test Data	
Temperature Rating	200° C (392° F) max conductor temperature
Voltage Rating	600 volts (rms) at sea level
Spark Test of Primary Insulation	not required
Impulse Dielectric Test	100% test, 8.0 kilovolts (peak) for sizes 18 and smaller 6.5 kilovolts (peak) for sizes 16 and larger.
Insulation Resistance	50,000 megohms for 1000 ft (min)
Wrap Test	"wrap back" test required, no cracking. Oven temperature: 313 ± 2° C (500 ± 3.6° F)
Blocking	260 ± 2° C (500 ± 3.6° F)
Shrinkage	0.03 inch max at 290 ± 2° C (554 ± 3.6° F)
Wicking	no requirement
Low Temperature (Cold Bend)	bend temperature: -65° ± 2° C (-85 ± 3.6° F) dielectric test: 3,000 volts (rms), 60 Hz
Thermal Shock	oven temperature: 200 ± 2° C (392 ± 3.6° F) max change in measurement: 0.06 inch
Flammability	post-flame dielectric test not required
Life Cycle	oven temperature 275 ± 2° C (527 ± 3.6° F) dielectric test: 3,000 volts (rms), 60 Hz
Dielectric Test After Immersion	3,000 volts (rms), 60 Hz
Acid Resistance	dielectric test, 3,000 volts (rms), 60 Hz
Conductor Strand Adhesion Requirements	shall be in accordance with 3.6.11 of MIL-W-22759
Abrasion Resistance After Immersion	no requirement
Humidity Resistance	no requirement
Surface Resistance	500 megohm-inches (min) initial and final readings
Smoke	290° C (554° F)
Color	in accordance with MIL-STD-104, class 1; white preferred
Color Striping or Banding Durability	250 cycles (500 strokes) minimum, 500 grams weight
Identification Durability	125 cycles (250 strokes) minimum, 500 grams weight
Wire Length Requirements	schedule A

Notes

Cable identified with manufacturer's name and part number.
Cable is sold in 1 foot increments. Specify desired length on purchase order.

SMALL DIAMETER EXCELLENT SOLDERABILITY

Tin Coated Copper Wire
with Crosslinked, Modified ETFE Insulation

Table II: Test Data	
Temperature Rating	150° C (302° F) max conductor temperature
Voltage Rating	600 volts (rms) at sea level
Short Term Thermal Stability	7 hours at 230 ± 2° C (446 ± 3.6° F). Quality conformance test, group II; test procedures and requirements as in life cycle test except for time and temperature of oven exposure.
Spark Test of Primary Insulation	not required
Impulse Dielectric Test	100% test, 8.0 kilovolts (peak)
Insulation Thickness	.005 inch (minimum)
Insulation Resistance, Initial	5,000 megohms for 1000 ft (min)
Physical Properties of Insulation	pulled at 2 inches per minute. tensile strength, 5,000 lbf/in ² (min.) elongation, 75% (min.)
Propellant Resistance	no dielectric breakdown.
Crosslinking Proof Test	7 hours at 300° C ± 3° C (572 ± 5.4° F). Quality conformance test, group II. Requirements and procedures as for life cycle except for time and temperature.
Wrap Test	"wrap back" test required, no cracking. Oven temperature: 200 ± 2° C (392 ± 3.6° F)
Blocking	200 ± 2° C (392 ± 3.6° F)
Shrinkage	0.125 inch max at 200 ± 2° C (392 ± 3.6° F)
Wicking	no requirement
Solderability	all conductors shall be tested in accordance with MIL-STD-202, method 208 without steam aging.
Low Temperature (Cold Bend)	bend temperature: -65° ± 2° C (-85 ± 3.6° F) dielectric test: 2,500 volts (rms), 60 Hz
Thermal Shock	oven temperature: 150 ± 2° C (302 ± 3.6° F) max change in measurement .060 inch
Flammability	quality conformance test, group II.
Life Cycle	500 hours at 200° C ± 3° C (392 ± 5.4° F). Dielectric test, 2,500 volts (rms), 60 Hz. Procedure to use mandrels coated with PTFE in the form of either enamel or wrapped tape, such that the diameter of the mandrels, after coating, still conform to the requirements of performance details.
Dielectric Test After Immersion	2,500 volts (rms), 60 Hz
Acid Resistance	no requirement
Conductor Strand Adhesion Requirements	shall be in accordance with 3.6.11 of MIL-W-22759
Abrasion Resistance After Immersion	no requirement
Humidity Resistance	after humidity exposure, wire shall meet the requirements for initial insulation resistance.
Surface Resistance	500 megohms - inches (min), initial and final readings
Smoke	200° C (392° F)
Color	in accordance with MIL-STD-104, class 1; white preferred. Conformity of color to the limits of MIL-STD-104 shall not be required after crosslinking proof test or life cycle oven exposure.
Color Striping or Banding Durability	125 cycles (250 strokes) minimum, 500 grams weight
Identification of Product	not required for size 24 and smaller. color code designator not required.
Identification Durability	125 cycles (250 strokes) minimum, 500 grams weight
Wire Length Requirements	schedule B

Tin Coated Copper Wire
with Overall Braid and Extruded ETFE Insulation

Table II: Test Data	
Temperature Rating	150° C (302° F) max conductor temperature
Voltage Rating	600 volts (rms) at sea level
Short Term Thermal Stability	7 hours at 230 ± 2° C (446 ± 3.6° F). Quality conformance test, group II; test procedures and requirements as in life cycle test except for time and temperature of oven exposure.
Spark Test of Primary Insulation	1,500 volts (rms), 60 Hz
Impulse Dielectric Test	100% test, 8.0 kilovolts (peak)
Insulation Thickness	0.003 inch (min) for primary insulation 0.004 inch (min) for outer jacket 0.008 inch (min) for total insulation
Insulation Resistance, Initial	sizes 24 through 10: 5,000 megohms for 1000 ft (min) sizes 8 through 00: 3,000 megohms for 1,000 ft (min)
Physical Properties of Insulation	pulled at 2 inches per minute. tensile strength, 5,000 lb/in ² (min.) 24-10 AWG: elongation, 125% (min.) 8-00 AWG: elongation, 75% (min.)
Propellant Resistance	no dielectric breakdown.
Crosslinking Proof Test	7 hours at 300° C ± 3° C (572 ± 5.4° F). Quality conformance test, group II. Requirements and procedures as for life cycle except for time and temperature.
Wrap Test	"wrap back" test required, no cracking. Oven temperature: 200 ± 3° C (392 ± 5.4° F) sizes and larger, mandrel diameter shall be 3 times the OD of the wire.
Blocking	200 ± 3° C (392 ± 5.4° F)
Shrinkage	0.125 inch max at 200 ± 2° C (392 ± 3.6° F)
Wicking	procedure II; weight increase, no requirement. Dye travel between layers of insulation 2.25 in (max) from end of specimen.
Solderability	all conductors shall be tested in accordance with MIL-STD-202, method 208 without steam aging.
Low Temperature (Cold Bend)	bend temperature: -65° ± 2° C (-85 ± 3.6° F) dielectric test: 2,500 volts (rms), 60 Hz
Thermal Shock Resistance	oven temperature: 150 ± 3° C (302 ± 5.4° F) max change in measurement: 24 AWG through 12 AWG: 0.060 in 10 AWG through 8 AWG: 0.100 in 6 AWG through 00 AWG: 0.125 in
Flammability	quality conformance test, group II.
Life Cycle	500 hours at 200° C ± 3° C (392 ± 5.4° F). Dielectric test, 2,500 volts (rms), 60 Hz. Procedure to use mandrels coated with PTFE in the form of either enamel or wrapped tape, such that the diameter of the mandrels, after coating, still conform to the requirements of performance details.
Dielectric Test After Immersion	2,500 volts (rms), 60 Hz
Acid Resistance	no requirement
Conductor Strand Adhesion Requirements	shall be in accordance with 3.6.11 of MIL-W-22759
Abrasion Resistance After Immersion	no requirement
Humidity Resistance	after humidity exposure, wire shall meet the requirements for initial insulation resistance.
Surface Resistance	500 megohms - inches (min), initial and final readings
Smoke	200° C ± 2° C (392° ± 3.6° F); no visible smoke.
Color	in accordance with MIL-STD-104, class 1; white preferred. For braided constructions, color shall be dark green within Munsell color limits of 5Y 3/2 and 5B 2/0.5. Conformity of color to the limits of MIL-STD-104 shall not be required after crosslinking proof test or life cycle oven exposure.
Color Striping or Banding Durability	125 cycles (250 strokes) minimum, 500 grams weight
Identification of Product	not required for size 24 and smaller. color code designator not required.
Identification Durability	125 cycles (250 strokes) minimum, 500 grams weight
Wire Length Requirements	schedule B

Nickel Coated High Strength Copper Wire
with Double Layer Tape Wrap Insulation

Table II: Test Data	
Temperature Rating	260° C (500° F) maximum continuous conductor temperature.
Voltage Rating	600 volts (RMS) at sea level
Color	white is the preferred color and shall be in accordance with MIL-STD-104, class 2. Colors shall be laser markable and meet the color limits defined. Conformity of color shall not be required after oven exposure.
Color Striping or Banding Durability	125 cycles (250 strokes), 250 grams weight
Continuous Lengths	Schedule B
Flammability Test	In accordance with AS4373, method 801 Requirements: Duration of after-flame 3 seconds max Flame travel 3.0 inches max No flaming of tissue
High Frequency Spark Test	(When used in lieu of impulse dielectric test) Test in accordance with AS4373, method 505, 5.7 kilovolts (RMS). Test 100% of the wire.
Humidity Resistance	After humidity exposure, wire shall meet the requirements for initial insulation resistance.
Identification Durability	125 cycles (250 strokes), 250 grams weight
Impulse Dielectric Test	8.0 kilovolts (peak). Test 100% of the wire
Insulation Resistance	5000 Megohms for 1000 feet (minimum)
Insulation State of Sinter	Quality conformance inspection performed on one sample per lot. Evaluate FP layers with a differential scanning calorimeter per AS4373, method 813. The difference in energy to melt between the first and second heats shall be less than or equal to 3 joules/gram.
Lamination Sealing	Group II quality conformance test. When tested in accordance with AS 4373, method 809 at 260° C for 6 hours. There shall be no evidence of tape separation or lifting. Three samples per lot shall be tested.
Life Cycle	500 hours at 290° C ± 2° C (554° F ± 3.6° F) Dielectric test, 2500 volts (RMS), 60 Hz. Use mandrels coated with PTFE such that the diameter of the mandrels after coating still conform to the required test mandrels diameters of table 6. After oven exposure, layers shall not separate and/or tapes shall not lift along the insulation or at the ends.
Low Temperature (Cold Bend)	Use mandrels and weights specified in Table 6. Chamber temperature -65° C ± 2° C (-85° F ± 3.6° F) Dielectric test, 2500 volts (RMS), 60 Hz
Shrinkage	.091 inch (max) at 290° C ± 2° C (554° F ± 3.6° F)
Smoke	260° C ± 5° C (500° F ± 9° F); no visible smoke
Solderability	Not required.
Strippability	Group II quality conformance test. After stripping with tools as defined in AS22759 and AS5457, no fragments of any layer shall extend more than .031 inches beyond the end of the polyimide tape layer.
Insulation Strip Force	Group II quality conformance test. Test in accordance with ASTM D 3032 section 27. The length of the insulation slugs shall be .25 inches. There shall be no evidence of insulation left on the conductor when viewed with the naked eye. Strip force: 0.25lb (min), 6.0lb (max)
Tape Overlap	In accordance with MIL-STD-2223, method 6005
Tensile Modulus	Test composite film in accordance with ASTM D 882, method A
Thermal Shock Resistance	Oven temperature 260° C ± 5° C (500° F ± 9° F), maximum change in measurement, .091 inches. No cracking.

100 OHM MATCHED-IMPEDANCE CABLE

LIGHTWEIGHT QUADRAX CABLE FOR AEROSPACE APPLICATIONS

High-speed transmission solutions for 10/100/1000BASE-T Ethernet applications

No Dollars
or Quantity
Minimum orders

**NO
MINS.**

Glenair offers Quadrax contacts for use with MIL-DTL-38999 Series I, II, III and IV connectors, as well as for use with Glenair designed connectors such as our Series 28 HiPer-D and our Series 80 Mighty Mouse. Compatible cables for use with these connectors and others such as ARINC 628, 629 and 664 are now available from Glenair with no minimum order quantity and available in-house termination services. Glenair Quadrax cables incorporate extruded/expanded PTFE as the dielectric insulator, with high-durability PTFE or FEP jacketing. Our Quadrax cable is resistant to a broad range of temperatures up to +200°C, and has been employed successfully in a wide range of high-speed 10/100/1000BASE-T Ethernet as well as FibreChannel and IEEE1394 aerospace applications.

Quadrax Cable Selection Guide

Quadrax

Quadrax cables for use with appropriate Quadrax contacts and connectors all share the following features: 100 ohm and 150 ohm performance, -65°C to +200°C, low outgassing PTFE and FEP materials, Low smoke and low toxicity. Selections are chosen for lightweight flexibility and durability in ruggedized applications. The use of extruded, expanded PTFE as the dielectric provides the best time delay performance and the lowest loss. The result is lower attenuation and a larger bandwidth. Exceeds Requirements of FAR 25.869

MIL-DTL-38999 Insert Arrangements for Keyed Quadrax Contacts

SPECIAL CONTACT ARRANGEMENTS FOR QUADRAX CONTACTS

About Keyed Contacts

All connectors intended for use with size #8 contacts have an alignment slot inside the contact cavity. Quadrax contacts have an alignment key to properly orient the contact.

A selection of MIL-DTL-38999 type connectors, with and without ground-plane inserts, for use with size #8 shielded Quadrax contacts. Glenair can supply our high-performance/high-frequency interconnect customers with turnkey solutions including contacts, wire and connector shells.

Series 80 Mighty Mouse New Size #8 Contact Arrangements

Quadrap

Now available – Mighty Mouse connectors with industry-standard size 8 Quadrap contacts

New Mighty Mouse connectors have size #8 snap-in, rear-release contacts for power and data applications. Available with 1, 2, 3, 4 or 5 contacts, these connectors meet the need for a low-profile, lightweight connector compatible with size #8 twinax, quadrap and coax contacts used in MIL-DTL-38999 connectors. Quadrap contacts are 100 ohm impedance for Ethernet applications.

- Size #8 contacts
- 1, 2, 3, 4 or 5 contacts
- Snap-in, rear-release
- Quadrap or Differential Twinax contacts
- Lightweight, low profile
- Series 801 (double-start) and 805 (triple-start) Mighty Mouse connectors

SERIES 962

HIGH-PERFORMANCE COAXIAL CABLE

MIL-C-17 QPL and commercial

Glenair high-performance Coax cables are constructed with silver plated conductors, insulated with fluoropolymer material, and finished with single or double layers of conductive shielding and appropriate jacket. Ideally suited for demanding military and commercial aerospace applications, these cables offer stable, predictable electrical performance under rugged mechanical and environmental conditions including repeated flexing, abrasion abuse, vibration, extreme temperatures, and exposure to aerospace fluids and chemicals. Glenair cable and contact engineers are available to review specific program requirements including environmental challenges, frequency requirements, loss budget, VSWR, and so on to select the most appropriate cable for every application.

Coaxial Cable

Coaxial cable has an inner conductor surrounded by a tubular insulating layer, surrounded by a tubular conducting shield. All our coaxial cables also have an insulating outer sheath or jacket. The term coaxial comes from the inner conductor and the outer shield sharing a geometric axis. Coaxial cable differs from other shielded cable used for carrying lower-frequency signals, such as audio signals, in that the dimensions of the cable are controlled to give a precise, constant conductor spacing, which is needed for it to function efficiently as a radio frequency transmission line.

MIL-DTL-38999 type and Series 80 Mighty Mouse Coaxial Contact Arrangements

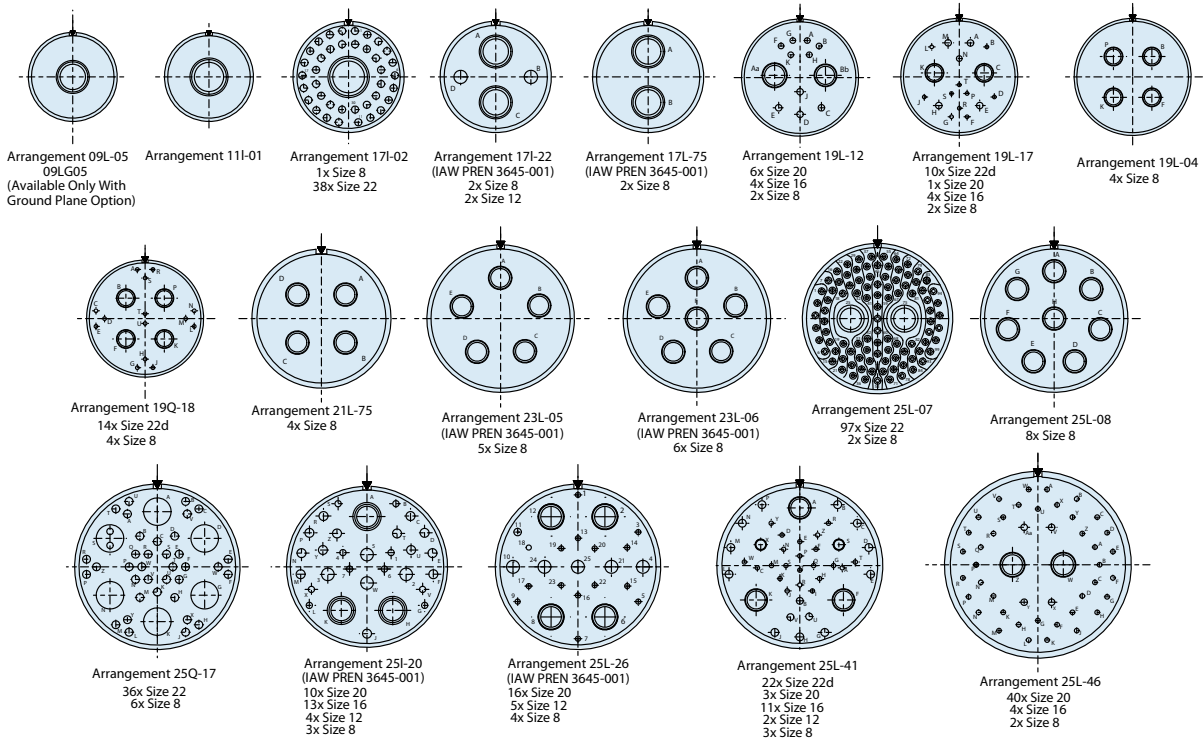

Coaxial

COAXIAL CONTACTS

Shielded coaxial contacts have a special role in the interconnect system and are designed for use in a wide range of military and aerospace connectors that service analog radio frequency or microwave applications. Most Glenair cylindrical connectors, including our D38999 type, can accommodate shielded contacts. Rectangular connector packages, such as our high-performance HiPer-D are also ideally suited for these shielded contacts.

Features and Notes

- Excellent Shielding Effectiveness
 - Low Passive Intermod (PIM)
 - Stable Loss, Phase and VSWR vs. Flexing
 - Uses Standard Solder-on Semirigid Connectors
- Cable identified with manufacturer's name and part number.
Cable is sold in 1 foot increments. Specify desired length on purchase order.

TURBOFLEX™

Ultra flexible, rugged power cable

No Dollars
or Quantity
Minimum orders

**NO
MINS.**

TurboFlex™ power distribution cables are fabricated from highly flexible conductors and high-performance insulation to produce cables ideally suited for applications where flexibility, durability, and weight reduction are required. Amazingly light and flexible—especially in cold weather—the 12 AWG – 450 MCM TurboFlex™ cable features rope lay inner conductors from either copper, tin-copper, or silver and nickel copper materials. TurboFlex also features Glenair's unique Duraelectric™ jacket material that offers outstanding flexibility, performance, and resistance to environmental and caustic chemical exposure. Duraelectric is also halogen-free, flame resistant and has a low smoke index appropriate for interior applications. Long life and performance are critical in power distribution applications. TurboFlex™ with its flexible conductors and durable jacket material delivers both. Contact the factory for a sample.

TurboFlex™ cable is optimized for use with Series 970 PowerTrip™ connectors and LouverBand contacts

TurboFlex™

Ultra-Flexible Power Distribution Cable

Product Showcase • Voltage Rating Data

The heart of TurboFlex™ power distribution cable is its ultra-flexible, ultra-fine wire conductor. TurboFlex™ power leads and flexible power transmission cables are made from bare copper, tin/copper, silver/copper or nickel/copper. Each material offers unique electrical performance, including current-carrying capability and temperature range. Ultra-flexible stranded bare copper or silver-plated copper conductors provide optimal conductivity. Tin/copper conductors offer superior solderability, and nickel/copper conductors offer superior corrosion resistance. All TurboFlex™ conductor materials deliver maximum flexibility and ability to handle the high voltage and temperature ranges inherent in such applications as military vehicles, aerospace ground support systems, and charging stations. Duraelectric™, the TurboFlex jacketing delivers superior flexibility/durability compared to other high-performance jacket materials.

Abrasion Resistance	Good
Wear Resistance	Good
Flame Resistance	Excellent
Sunlight Resistance	Excellent
Flex Resistance	Excellent

DURAELECTRIC™ ENVIRONMENTAL PERFORMANCE

Temperature rating: -60°C to 260°C
 Halogen free per IEC 60614-1
 Accelerated weathering and simulated solar radiation at ground level per IEC 60068-2-5; 56 Days exposure, suitable for greater than 50 years of service in direct sunlight
 Flame resistant per IEC 60614-1
 Flame resistant per UL 1685, section 12 (FT4/IEEE120), vertical-tray fire-propagation and smoke release test
 Flame resistant per FAR 25.853 (A) amendment 25-116, appendix F part I (A) (1) (i), 60 second vertical burn test
 Limiting oxygen index of 45 per ISO 4589-2:1999
 Low smoke per NES 711, smoke density of 11.75
 Smoke density class F1 per NF 16-101 IAW DIN EN 60695-2-11:2011
 Low smoke toxicity per NES 713, tested value of 1.9

Fungus rating of 0 per MIL-STD-810g method 508.5, Does not support fungal growth

ASTM D624, die B tear strength, 150 pounds per inch minimum on jacket material

Low outgassing per ASTM e595 after post curing, TML .06%, CVCM .006%, WVR .02%

Resistant to fluids per MIL-STD-810F, method 504

JP-8 per MIL-DTL-83133 (NATO type 34)

MIL-H-5606 hydraulic fluid

MIL-PRF-23699 lubricating oil

MIL-C-85570 cleaner

TT-I-735 Isopropyl alcohol

AMS 1432 potassium acetate

deicing/anti-icing fluid

MIL-C-87252 coolant

Amerex AFF fire extinguishing foam

Rugged high-temperature, environmental Duralectric™ jacketing is available in a broad range of and colors including safety orange

Duralectric™ is the high-performance TurboFlex™ jacketing material perfectly suited for immersion, chemical or caustic fluid exposure, temperature extremes, UV radiation and more

Glenair *Duralectric*™ weatherproof jacketing is halogen free, flame resistant, and functional to 260°C. *Duralectric*™ far surpasses the accelerated solar weathering standards under IEC 60068-2-5, and is tested to 56 accelerated days, equivalent to 53 years of solar exposure. Glenair can supply the material in a variety of formats, including blown jacketing, as an extrusion over wire and cable, as an overmolding compound and as a self-vulcanizing repair tape.

Jacketing Options		
0	Black	Weatherproof, halogen free, flame resistant, functional to 260°C
1	Desert Tan	Fed Std #33446 Desert Tan color
2	Red	Pantone® 1797 U
3	Orange	OSHA Safety Orange to mark energized electrical cables
4	Yellow	Pantone® Yellow U
5	Green	Pantone® 355 U
6	Blue	Pantone® 3005 U
7	Violet	Fed Std 595; #37100
8	Gray	Qualified to US Navy MIL-PRF-24758A, Fed Std 595B #26270 Haze Gray color
9	White	Fed Std 595; #37875

Jacketing Material Properties	
Material Property	Duralectric™
Temperature Range	-60°C to +260°C
Specific Gravity	1.22
Weight: Lbs./Cubic Inch	.045
Abrasion Resistance	Good
Wear Resistance	Good
Flame Resistance	Excellent
Sunlight Resistance	Excellent

Chemical Resistance	
Aliphatic Hydrocarbons	Excellent
Aromatic Hydrocarbons	Excellent
Ketones, Etc.	Excellent
Oil & Gasoline	Excellent

Glenair Duralectric™ Material Specifications	
Temperature rating: -60°C to +260°C (with excursions to 290°C)	
Halogen free per IEC 60614-1. Less than 5mg of hcl per 1 gm of product tested.	
Accelerated Weathering (Solar) per IEC 60068-2-5; 56 days exposure	
Flame Resistant per IEC 60614-1; Material does not sustain combustion when the source of flame is removed.	
Low Smoke Index per NES 711 (11.75); Minimum standard is 25. The Glenair tested level is 11.75. This makes the material acceptable for interior applications as well as topside.	
Smoke Density Class F1 Per NF F 16-101 IAW DIN EN 60695-2-11:2001	
Toxicity Index per NES 713 (1.9); Minimum standard is 5. The Glenair tested level is 1.9. This makes the material acceptable for interior applications as well as topside.	
Colorable to Fed Std 595B	
Markable IAW MIL-PRF-24758A	
Oxygen Limiting Index = 45.1 Per EN ISO 4589-2:1999; Minimum is 28.	
ASTME E 595 vacuum outgassing—post bake results: TML .06%, CVCM .006%, WVR .02%	
Fungus resistance testing (rating of 0) per MIL-STD-810F, method 508.5	
ASTM D624 DIE B tear test: 150 KN/M	
12 Sec Vertical Burn: (Pass) Per 14CFR Part 25.853(a) amdt 25-116 App F Part 1 (a)(1)(ii)	
Fluids Per MIL STD 810F, Method 504	Cleaner (MIL-C-85570): CALLA-855
Fuel (MIL-T-83133): JPG	Solvent (Isopropyl Alcohol): TT-I-735
Fuel (MIL-T-83133): JPG	De Icer (AMS-1432): E36 Runway Deicer
Hydraulic Fluid (MIL H 5606): ROYCO 756	Coolant (MIL-C-87252): Coolanol 25R
Lube Oil (MIL-L-23699): ROYCO-500	Fire Extinguishant Foam: AMEREX AFFF

Series 970 PowerTrip™ Connectors for use with TurboFlex™ Cable

Lightweight plug with ratcheting coupling nut and LouverBand contacts

Keyed receptacle with superior sealing and EMI shielding

- Fast, easy mating with triple-start ACME thread: 360° turn for full mating
- Reduced size and weight compared to MIL-DTL-5015
- LouverBand sockets for improved current ratings and longer life
- Splined backshell interface for improved backshell attachment and EMI shielding
- Ratcheting coupling nut for secure mating
- Operating temperature -65° C to +200° C

PowerTrip™ and TurboFlex™—The ultimate rugged-environment power transmission solution

MIL-DTL-5015 contact arrangements

MIL-DTL-38999 triple-start coupling

Singlemode and multimode graded index fiber optic cable for mission-critical applications

Well designed fiber optic connection systems begin with high-reliability single and multimode cable. Glenair is able to fabricate and supply a targeted range of fiber media—all available without expensive minimum length requirements. The goal of our fiber media shop is to provide a fast-turn supply of specialty F/O media for use in our own cable assemblies, customer prototype projects and other short-run, limited bulk length applications. Nobody can beat Glenair when it comes to providing fiber optic media with rugged and yet flexible media protection. We are absolute experts in this field and can suggest and supply everything from jacketed cable resistant to fuel exposure to crush-proof polymer-core conduit solutions. And because we make and stock all the component parts ourselves, we can offer lightning-fast turnaround on even highly specialized requirements.

SERIES 050 Harsh-Environment

Opto-Electronic Interconnect Solutions

Opto-electronic media converters and active components for Ethernet, high-speed digital data, video media, and signal aggregation

- Significant performance advantages over electrical copper including expanded bandwidth, reduced size and weight, increased distance, and improved electromagnetic compatibility
- Take advantage of fiber optic virtues, while reducing complexity and maintenance of fiber optic systems
- Size #8 Opto-Electronic contacts for singlemode and multimode optical fiber

SIZE #8 CAVITY OPTO-ELECTRONIC CONTACTS AND ACTIVE CONNECTORS

- Fast and Gigabit Ethernet, DVI, HDMI capable transmitter and receiver-equipped contacts
- ARINC 664, 801, 803, 804 and 818 standard compliant
- Link distances up to 550 meters, multimode
- Single, 3.3 V power supply
- Wave-solderable termination with RoHS-compliant solders

Mighty Mouse receptacle incorporating size #8 opto-electronic contacts

SERIES 050 Harsh-Environment Opto-Electronic Interconnect Solutions

ENVIRONMENTAL OPTO-ELECTRONIC SOLUTIONS

- Ethernet media converters 10/100/1000 and 10G
- Video media converters DVI, SDI, ARINC 818
- High-Speed digital data to 12.5 GB/sec
- Signal aggregation media converters
- Custom solutions with ruggedized, ultraminiature packaging to suit any application

MEDIA CONVERTER

- 10/100/1000BASE-T to 1000BASE-SX/LX10 media converter
- IEEE 802-3-2005 Gigabit Ethernet standard compliant
- Up to 550 meters, multimode
- Up to 10 kilometers, singlemode

Table I: Signal Protocol		
Code	Name	Medium
SX	1000BASE-SX	Multimode Fiber
LX10	1000BASE-LX	Singlemode Fiber

SEVEN PORT UNMANAGED ETHERNET SWITCH

- Seven copper (10/100/1000 Mbps) Ethernet ports IAW IEEE 802.3:2005
- Cable distances up to 100 meters
- Unmanaged Ethernet switch, no configuration required
- Non-blocking switch fabric allows 1000 Mbps data rate on all seven ports simultaneously

ACTIVE/OPTICAL CABLE WITH MEDIA CONVERTER

- 10/100/1000BASE-T to 1000BASE-SX/LX10 active cable
- IEEE 802.3:2005 Gigabit Ethernet standard compliant
- Up to 550 meters, multimode
- Up to 10 kilometers, singlemode

9.3/125 SINGLEMODE GRADED INDEX FIBER OPTIC CABLE WITH HYTREL JACKET

PROTOCOL-SPECIFIC HIGH-SPEED CABLE

For USB, Ethernet, SATA and other general-purpose/protocol-specific applications

All of the cables in this section have been selected for protocol compliance in accordance with industry-standard Ethernet, USB, and SATA/eSATA specifications and harsh mission-critical application environments. Without exception, cables have been designed and fabricated to optimize flexibility, weight reduction, ruggedness, and insulator quality. Each cable is offered with specific guidance as to shielding properties, impedance performance, attenuation, temperature rating, bend radius, weight, and maximum practical distance. Many of these cables are ideally suited for application with Glenair designed connectors such as our Series 80 Mighty Mouse, Series 79 Micro-Crimp, and other connectors designed for use in high-speed applications. All of the cable part numbers detailed here are in stock and ready for immediate, same-day shipment with no length or dollar minimums.

Mighty Mouse High-Speed and Ultra-Twinax: high-speed performance and signal integrity in an ultraminiature package

Glenair has expanded the Mighty Mouse line to include contacts and connectors optimized for high-speed digital applications. A wide range of interconnect technologies are available, including

- *High-Speed* series 80 with DuPont™ Teflon® insulators for superior electrical performance in protocol-specific applications like eSATA and USB 2.0/3.0. These connectors are ideally suited for use with Ethernet, USB and other protocol-specific wire types presented in this chapter.
- Mighty Mouse *Ultra-Twinax* connectors utilizing size #12 Twinax contacts for differential pair applications such as LVDS and CML, and 963-001 100 Ohm differential parallel pair data cable

MIGHTY MOUSE HIGH-SPEED

Series 80 Mighty Mouse *High Speed* Connectors with DuPont™ Teflon® PFA Insulators

- For use with high-speed protocol wire including eSATA, 10GBASE-T, USB 2.0 / 3.0
- DuPont™ Teflon® PFA insulators for superior insertion loss and balanced impedance
- Series 801 double-start ACME thread and Series 804 push-pull quick disconnect connectors available
- Discrete components or overmolded cordsets

MIGHTY MOUSE ULTRA-TWINAX

- For ultra high-speed differential pair applications such as LVDS, CML and 963-001 100 Ohm differential parallel pair data cable
- Size #12 Twinax and hybrid contact arrangements
- Series 801 double-start ACME thread connectors
- Discrete components or overmolded cordsets

Series 80 Mighty Mouse *Ultra-Twinax* Connectors with Size #12 Twinax contacts

Mighty Mouse *ultra-twinax* plug and receptacle cutaway

Protocol Specific Cables For USB, Ethernet, HDMI and Others Compatible Connectors

This table compares contact and wire spacing and bandwidth performance in miniaturized interconnect applications. As contact density increases, the performance of the interconnect improves. Note the position of the High-Speed PFA and Size #8 Mighty Mouse compared to standard Mighty Mouse, and the position of the Ultra-Twinax Mighty Mouse with performance up to 10 GHz. The Series 80 Mighty Mouse High Density (HD) connector also performs exceptionally well in bandwidths up to 5 GHz, by virtue of its high-density TwistPin contact insert arrangements.

PSELFEXT	20.8 dB @ 100 MHz
Temperature Rating	200° C
Minimum Bend Radius	1.25" (dynamic) 1.00" (static)
Weight	4.8 lbs/100 ft
Max Cabling Distance	80 meters (100BASE-T)

Final Assembly	
Cable	Four twisted pairs cabled around a center filler
Binder	Skive PTFE tape
Shield 1	Aluminum polyester
Shield 2	38 AWG silver plated copper braid 80% coverage
Jacket	Polyurethane (Estane 58244) Color: Black .030" minimum jacket wall

Notes

Cable identified with manufacturer's name and part number.
 Cable is sold in 1 foot increments. Specify desired length on purchase order.

963-003 Avionic Cat 6a Ethernet Cable

963-003: 10G BASE-T ETHERNET CABLE WITH FEP JACKET

How to Order	
963-003-24	24 AWG
963-003-26	26 AWG

Construction Details		
	963-003-24	963-003-26
Conductor	24 AWG silver plated copper	26 AWG stranded silver plated copper
Insulation	FEP	PFA
Colors	Pair #1 white/blue and blue stripe Pair #2 white/orange and orange stripe Pair #3 white/green and green stripe Pair #4 white/brown and brown stripe	Pair #1 white/blue and blue stripe Pair #2 white/orange and orange stripe Pair #3 white/green and green stripe Pair #4 white/brown and brown stripe

Final Assembly		
	963-003-24	963-003-26
Conductors	Silver plated copper	Silver plated copper
Insulation	FEP	PFA
Cable	Four twisted pairs cabled around a center filler	Four twisted pairs cabled around a center filler
Spline	FEP	Fluoropolymer
Binder	Skive PTFE tape	Fluoropolymer tape
Shield 1	Aluminum mylar	n/a
Shield 2	38 AWG silver plated copper braid 90% coverage	silver plated copper braid 80% coverage
Jacket	FEP Color: Translucent blue .275" Nominal OD	PTFE laser printable jacket Color: White .220" nominal OD

Properties		
	963-003-24	963-003-26
Impedance	100 Ohms ± 10%	100 Ohms ± 10%
Attenuation (dB/100 Ft)	10 MHz - 2.4 100 MHz - 7.5 500 MHz - 17.7	10 MHz - 3.7 100 MHz - 11.2 500 MHz - 24.0
NEXT	10 MHz - 59.3 100 MHz - 44.3 250 MHz - 38.3 500 MHz - 33.8	10 MHz - 59.3 100 MHz - 44.3 250 MHz - 38.3 500 MHz - 33.8
SRL	10 MHz - 25.0 100 MHz - 20.1 250/500 MHz - 15.2	10 MHz - 25.0 100 MHz - 20.1 250/500 MHz - 15.2
Capacitance (pF/ft)	14.5 (nominal)	14.5 (nominal)
Velocity of Propogation	70% (nominal)	70% (nominal)
DWV	1.5 KV RMS	1.5 KV RMS
Temperature Rating	-55° to +200° C	-55° to +200° C
Minimum Bend Radius	1.4 Inches	.660 Inches
Weight	5.5 lbs/100 ft	3.05 lbs/100 ft
Max Cabling Distance	240 Feet (10GBASE-T)	188 Feet

Notes

Cable identified with manufacturer's name and part number.
 Cable is sold in 1 foot increments. Specify desired length on purchase order.
 Meets TIA-568B CAT-6A requirements when terminated to appropriate high speed connectors.
 Skydrol resistant, RoHS compliant and passes flamability requirements of FAR part 23 and 25, appendix F.

963-004: 10G BASE-T ETHERNET CABLE WITH PVC JACKET

Construction Details	
Conductor	23 AWG solid copper alloy (.024" OD)
Insulation	Foam FEP (.057" OD)
Colors	Pair #1 white with blue stripe Pair #2 orange/white with orange stripe Pair #3 green/white and green stripe Pair #4 brown/white and brown stripe
Pair Shield	Aluminum mylar, 100% aluminum side facing out (.115" OD)
Overall Shield	Braid, silver plated copper 38 AWG, 85% minimum (.274" nominal OD)
Jacket	0.298" nominal OD

Properties	
Impedance	100 Ohms ± 10%
Attenuation (dB/100 M)	10 MHz - 5.7 100 MHz - 18.5 300 MHz - 33.3 600 MHz - 48.9 1000 MHz - 64

	200 MHz - 19.5 400 MHz - 35.0
Skew	100 ps max / 16.4 feet (5 meters)
Velocity of Propagation	70% (nominal)
DWV	1000V RMS
Temperature Rating	FEP: -55° to +200° C Polyurethane: -30° to +105° C
Weight	2.9 lbs/100 ft

Construction Details		
Data Pair	Conductor	2x 26 AWG (19/38) silver plated copper alloy (.019" OD)
	Insulation	FEP (.035")
	Colors	Green and white
	Shield Coverage	Silver plated copper, 38 AWG, 95% minimum
Power Pair	Conductor	2x 22 AWG (19/34) silver plated copper alloy (.030" OD)
	Insulation	FEP (.050")
	Colors	Red and black
Drain Wire	Conductor	26 AWG (19/38) silver plated copper alloy (.019" OD)
	Filler	PTFE rod, optional
	Overall Shield Coverage	Silver plated copper, 38 AWG, 95% minimum (.176" nominal OD)
	Jacket Diameter	.200" nominal

Notes

Cable identified with manufacturer's name and part number.
Cable is sold in 1 foot increments. Specify desired length on purchase order.

963-012
High Data Rate Cable • USB 3.0 Type

963-012: HIGH DATA RATE CABLE • 3.0 USB TYPE WITH POLYURETHANE JACKET

Construction Details			
1	2x Data Pair 90 Ohms (Twisted, Shielded)	Conductors	2x 26 AWG (19/38) silver plated copper
		Insulation	FEP
		Colors	Pair 1: Violet and orange Pair 2: Blue and yellow
		Drain	26 AWG (19/38) silver plated copper
		Shield	Al/Polyester, 50% lap (foil side in)
2	Data Pair 90 Ohms (Twisted)	Conductors	2x 26 AWG (19/38) silver plated copper
		Insulation	FEP
		Colors	Green and white
3	Power Pair	Conductors	2x 24 AWG (19/36) silver plated copper
		Insulation	FEP
		Colors	Black and red
4	Mylar Tape	50% Min Overlap	
5	Overall Shield	36 AWG silver plated copper braid. 90% coverage minimum	
6	Overall Jacket	Polyurethane, Ø .272 In nominal, black	

Properties			
Impedance	90 Ohms ± 10		
STP Performance (nominal)	f (GHz)	IL (dB/m)	Next (dB)
	1.25	-1.8	-74.6
	2.5	-2.6	-67.7
	5	-4.0	-53.1
	7.5	-5.7	-53.5
DWV	300VAC		
Temperature Rating	-30C to +105C		
Weight	47.8 lb/1000 ft		

Notes

Cable identified with manufacturer's name and part number.
 Cable is sold in 1 foot increments. Specify desired length on purchase order.

006
Cable Jacket Material

- 1 - Less Jacket
- 2 - FEP (translucent blue)
- 3 - Polyurethane, zero halogen, Estane 58244 TPU or equivalent (black)

2

Construction Details	
Conductors	24 AWG (19/36) silver plated copper alloy (.0235" OD)
Insulation	Foam FEP, .054" OD
Filler	FEP .022" nominal OD
Overall Binder	PTFE tape wrap
Overall Shield #1	40 AWG silver plated copper braid
Overall Shield #2	38 AWG silver plated copper braid
Jacket Diameter	.190" nominal, .200" max

Properties	
Impedance	110 Ohms \pm 6 (measured differentially)
Attenuation (dB/100 ft)	10 MHz - 2.9 100 MHz - 7.5 500 MHz - 15.0 1 GHz - 22.5
Skew	2.0 PS/ft typical, 3.5 PS/ft Max (within pair)
Velocity of Propagation	80% (nominal)
Capacitance	12.5 PF/ft nominal (between pairs, ground floating)
DWV	1500V RMS conductor/conductor 1000V RMS conductor/shield
Temperature Rating	FEP: -55° to +200° C Polyurethane: -30° to +105° C
Weight	3.5 lbs/100 ft

Notes

Cable identified with manufacturer's name and part number.
 Cable is sold in 1 foot increments. Specify desired length on purchase order.

963-013: 100 OHM SATA/eSATA CABLE WITH POLYURETHANE JACKET

Construction Details	
Conductors	2x 28 AWG (7/36) silver plated copper
Insulation	.0115" NEWcel to .038" ± .002"
Drain Wire	2x 28 AWG (7/36) silver plated copper
Braid	44 AWG silver plated copper, 90% coverage minimum
Tape	.0015 Al/polyester, 50% lap (foil side in)
Jacket	.005" PFA to .099" ± .005
Wire Colors	white and blue (pair 1) white and orange (pair 2)
Filler	LSNW polyester
Wrap	.002" PTFE tape, 50% lap
Overall Shield	35 AWG tin copper braid, 90% coverage minimum
Overall Jacket	.035" polyurethane, .299" OD nominal, (black)
Marking	print on outer jacket in white ink
Temperature Range	-30°C to +130°C

Notes

Cable identified with manufacturer's name and part number.
Cable is sold in 1 foot increments. Specify desired length on purchase order.

Spacewire

Reduced Cost of Ownership, Easy Integration, and High-Performance for Flight and Lab Grade Cable Assemblies.

The success of any space mission begins with reliable data transmission and Glenair Spacewire cables, built to meet the strict standards set forth by ECSS-E-ST-50-12C, make this a reality. Our Spacewire cables offer bidirectional, high speed data transmission rates up to 400 Mbits/s while significantly reducing cross talk, skew, and signal attenuation. By incorporating a serial, point-to-point cable, with low voltage differential signaling (LVDS) reduced costs are realized through an easily integrated data transmission cable. These features allow Spacewire cables to be incorporated across various satellite programs without the expense of costly design customization.

Spacewire: The Space Industry Data Transmission Standard

Glenair Spacewire assemblies begin with a high performance cable built with expanded polytetrafluoroethylene (ePTFE) insulation. This material allows for low-loss transmission of LVDS signals maximizing data-rates while allowing for the implementation of standard hardware protocols, thus eliminating the need for design customization and long lead time cable projects.

Typical Uses Include

- EGSE applications
- Radar sensor systems
- Hi-resolution camera equipment
- Sensor, mass-memory unit, and telemetry subsystem interconnections

Approved for Use by:

- ESA
- NASA
- JAXA
- RKA

Connector/Cable

- Laboratory and Space Grade Versions Available
- Qualified MIL-DTL-83513 Micro-D Connector
- Gold Plated Copper Alloy TwistPin Contacts
- Basic Cable, 4 Twisted Pair Cables and a Ground
- Epoxy Resin Potting
- EMI Banding Backshell

Performance

- 3 Amps
- Temperature Tolerance -200 to 180° C
- 100 Ω Impedance Shielded Signal Pair
- Very Low Skew, Signal Attenuation and Cross Talk
- 65dB Minimum Attenuation Shielding Effectiveness
- Low Magnetic Permeability IAW EIA-364-54

SERIES 20

SuperTwin™

Lightweight Composite Modular Connectors

Drop-in replacements for legacy modular rectangular connectors save weight, space, and assembly time

Today's high-performance commercial aircraft are looking for revolutionary materials and product designs that can reduce weight and improve reliability and performance. The Glenair Series 20 Super-Twin™ lightweight modular connector is a drop-in replacement for legacy cable and panel connectors that no longer meet these performance specifications—especially for ease of assembly, electromagnetic compatibility and size, weight and power optimization.

The Glenair Series 20 Super-Twin™ can accommodate a broad range of contact sizes and types from #23 to #8 signal, Quadrax, El Ochito®, power, and fiber. Modular inserts offer fast and flexible assembly and repair. Peripheral and grommet seals provide outstanding environmental protection. Keyed inserts and shells provide versatile polarization and protection against mis-mating. The innovative clamshell and banding porch design brings modern, state-of-the-art connector capabilities to modular cable and panel applications.

- For reduced size and weight cable and panel applications
- Lightweight composite shell with integral strain relief/banding porch
- Modular inserts support a wide range of contact sizes and types up to #8
- Polarization – both shell and inserts
- Center jackscrew with self-locking hardware

For more information contact Glenair at 818-247-6000 or visit our website at www.glenair.com U.S. CAGE code 06324

SERIES 20 Super-Twin™ Lightweight Composite Modular Connectors

SUPER-TWIN™ SHELLS AND INSERTS ARE ORDERED SEPARATELY

How To Order - Shells						
Sample Part Number	200-013	P	2	-XM	31	K
Series 20 Modular Connector	200-013 Plug Shell 200-014 Receptacle Shell					
Plug/Receptacle	P = Plug Shell, R = Receptacle Shell					
Size	Size 2					
Finish	XM = Electroless Nickel XB = No plating, black					
Polarization Code	2 digits: First digit 1 – 4 (factory installed) Second digit 1 – 4 (factory installed) Blank = keys supplied as kit					
MicroBand Option	K = MicroBand supplied. Blank = no MicroBand					

How To Order - Inserts						
Sample Part Number	200-005	P	2	-60	A	
Series 20 Modular Connector	200-005 Pin Insert 200-006 Socket Insert					
Pin/Socket Insert	P = Pin Insert, S = Socket Insert					
Size	Size 2					
Insert Pattern	60 = 60X #23 contacts					
Polarization	A, B, C, D, E, F, G, H (must match with shell polarization)					

PATTERN 60
60 X Size 23 Contacts
DWV= 750 VAC

PATTERN 7W4
4 X Size 12 Contacts
7 X Size 20 Contacts
DWV= 1500 VAC

PATTERN 14Q2
2 X Size 8 Contacts
14 X Size 23 Contacts
DWV= 750 VAC

PATTERN 48
48 X Size 23 Contacts
DWV= 1300 VAC
DWV@50 000 ft = 800 VAC

PATTERN 21
21 X Size 20 Contacts
DWV= 1500 VAC

PATTERN 10
10x Size 16 Contacts
DWV= 1500 VAC

Modular inserts easily removed with available tool

Keyed, snap-in-place insert modules are currently available in six tooled layouts, accommodating size #23, #20, #16, #12 and keyed size #8 contacts (for use with Quadrax or El Ochito™ contacts).

Weight Study, Typical Regional Jet Airframe

Series 20 SuperTwin™
Mated Pair: 67g
Weight/Plane: 7,661g

Legacy rectangular: aluminum
Mated Pair: 192g
Weight/Plane: 22,103g

Legacy rectangular: composite
Mated Pair: 141g
Weight/Plane: 16,123g

Summary:
Using Series 20 composite instead of legacy aluminum connector saves **14,442 grams** (31.8 lbs) per plane.

Using Series 20 composite instead of legacy composite connector saves **8,482 grams** (18.6 lbs) per plane

Series 20 Super-Twin™ Performance

DWV	1500 Vac; 750 VAC (#23 contacts)
Shell-to-Shell	2.5 mΩ
Temp Range	-65°C / +125 °C
Shock*	50 g, half sine, 18x
Vibration*	Random, 8 hrs/axis, Type VI, cond. G (27.8 g)
Altitude Immersion*	12.1 kPa (15000 m / 49000 ft)
Lightning Indirect Effects	3 kA min

*Test by similarity, Series 79 Micro-Crimp

Spacewire

TECHNICAL SPECIFICATIONS

Notes:

1. Flight grade (cable Type F) assemblies to be screened IAW NASA EEE-INST-002, Table 2. Level 1 with 100% thermal vacuum outgassing (24 hours/+125°C/10⁻⁶ torr) reference Glenair Mod Code 429C.
2. Operating temperature - 200°C to +180°C. Reference Glenair Mod Code 428
3. Electrical performance:
Dielectric withstanding voltage: 600 VAC
Insulation resistance: 5000 megohms @500 VDC
4. Assembly to be identified with Glenair's name, Part Number, Cage Code and Date Code or ESCC Component Part Marking Standards.

Materials/finish:

- Shells/backshells - aluminum alloy/electroless nickel
- Insulators - high grade rigid dielectric/N.A.
- Contacts - copper alloy, gold plated
- Hardware - stainless steel/passivated

MICRO CRIMP

Series 79 Micro-Crimp: The high-performance rectangular with advanced EMC and electrical performance

- Mighty Mouse rectangular series connector
- Crimp, PCB, fiber optic, coax, power and pitot
- Precision machined aluminum shells sealed to IP67
- High-density #23 contact contact arrangements set on .076" centers
- Blind mating for rack and panel applications
- Over 30 tooled contact arrangements
- Integrated ground spring for improved EMI shielding

Glenair has developed an extensive range of innovative contacts including solutions for fiber optic and pneumatic applications. The development of our own range of high-performance contacts was a key step in gearing Mighty Mouse, Micro-Crimp, PowerTrip, and our many other innovative connector solutions to meet any interconnection challenge. This page highlights a selection of these high-performance contacts, from standard 39029 crimp signal and power contacts to our own unique shielded differential Twinax contact, miniaturized fiber optic contacts and highly specialized gas and pneumatic contact solutions. All our contacts are supported with appropriate extraction and crimp tools—and of course the wire and cable catalogued in this book. As always, these Glenair technologies are available with no dollar or quantity minimums, and are in-stock and ready for immediate, same-day shipment.

for your next interconnect cable and harness application?

Harsh Environment Overmolded Multi-Branch Assemblies

Harsh Environment Fiber Optic/Electrical Assemblies

Inside-the-Box Fiber Optic/Electric Pigtail Assemblies

Lightweight/Compact Flex Circuit Assemblies

Multi-Branch Assemblies with Protective Fabric Braiding

Glenair has been the go-to cable house for high-performance interconnect cable assemblies for more than 50 years. We specialize in delivering terminated, tested cable harnesses and assemblies with 100% reliability and quality control. We offer complete, turnkey cable assembly services from design engineering to fabrication and test, and are qualified to all military and commercial aerospace standards.
